

## Firefighters and Paramedics Burn Victim Scam

This message comes from a concerned Durham resident:

“Last evening we received a phone solicitation from a person representing Firefighters and Paramedics to help burn victims. I asked that they send information to us in the mail and that we would consider their request when we had some money to donate. The caller did not ask for our address but politely hung up. I saw on channel 8’s website that this scam is being used in Tolland and that people are asked to call the Consumer Protection Division to report any calls. I will do this later today but thought that you might also like to know so that others in town may be alerted.”
